

## FLIGHT ACTIVITY REGULATIONS

1. The User declares to be aware of the provisions governing the use of the runway, including traffic patterns and the Letter of Agreement, which are an integral part of this Agreement.
2. The execution of any aerial acrobatics is prohibited within a 5 km radius of the Airfield.
3. The use of the runway is subject to the consent of the Grantor who, at any time and at their sole discretion, may suspend flight activity.
4. The use of the runway is prohibited for aircraft that are not insured, lack a radio device and airworthiness certificate, and for pilots whose flight documents are not in order or have expired.
5. The runway will be closed for ordinary and extraordinary maintenance, and whenever, in the judgment of the Grantor, it becomes necessary.
6. Fuel purging on the grass surface is absolutely PROHIBITED.
7. The User declares to have read the "Letter of Agreement" attached as Annex 3 to this Agreement and, in particular, clauses 3 (Applicability), 5 (Airspace Use Procedures), 6 (Limitations), and 7 (Liability).
8. The User has read the authorization issued by ENAC pursuant to Article 7 of the Letter of Agreement and undertakes to comply with the conditions/limitations contained therein, as well as in the OPERATIONS Letter of Agreement.
9. The User undertakes to always act in accordance with the provisions of the Letter of Agreement attached as Annex 3 to this Agreement and, in particular, to comply with the provisions of clauses 3 (Applicability), 5 (Airspace Use Procedures), and 6 (Limitations).
10. Each pilot must annually send to the Manager, via email to: **info@aviosuperficienarder.it**, documentation attesting to their personal flight qualifications and regular aircraft maintenance, so that the manager can verify their regular validity. Failure to send the required documentation authorizes the manager to suspend flight permits. Responsibility, however, is always attributable to the Pilot-Member or their representative.
